

ABN Ag Biologicals

Achieving consistent and reproducible stabilization
Four samples with an average loss of 0.43 Logs in 120 days

ABN Ag Biologicals

Four samples sets with average ~ 1.0 log loss after 250 days

ABN Ag Biologicals

Sample Set	Variable	Log Loss 120 days	Log Loss 180 days
65A	Application component	0.66	0.70
65B	Component/process	0.56	0.92
65C	Application component	0.67	0.52
65D	Component/process	0.77	1.10
65E	Process	1.0	1.01
65F	Process	1.0	1.29
65G	Chemistry	2.05	2.26

Understanding the interactions between formulation ingredients and application processes—approaches to stabilization of Rhizobia on seeds
